

MSSH ASM 2012 Pre-Congress Workshop

Saturday, February 11th 2012

With 20 years of experience in fracture fixation in various surgical specialties, Humedical (sole distributor of OsteoMed) now provides solutions to hand fracture fixation through our comprehensive hand plating system, hps™. The hps™ includes a variety of plates and screws including 1.6mm variable angle locking screws, cannulated head and headless screws and a unique Subcondylar plate for fixation of complex fractures. This workshop will focus on fixation of common and complex fractures with hands-on on sawbone model.

PROGRAM:

15:00-15:30 : Metacarpal fracture fixation using 2.0mm HPS

15:30-16:00 : Phalanx fracture fixation using 1.6mm HPS

16:00-16:20 : Tea Break

16:20-16:50 : Scaphoid fracture using headless cannulated screws

16:50-17:20 : DIP fusion, Intra-articular fracture and other small bone fractures using headless cannulated screws.

17:20-17:30 : Discussion
